Sample Request and Response .....	13
Table of changes .....	18

## Rapid Finance Partner API Version 20

### Important Notes:

1. Properties are case sensitive and all camel-case: property starts with a capital letter.
2. Dates need to be supplied in international format:
  - a. YYYY-MM-DD (Example for sending June 10<sup>th</sup> 2016: 2016-06-10)
  - b. No time is required
3. Parameter “leadWSModel” node starts with lower case letter.
4. Campaign must be associated with the company.
5. SSN should be in format XXX-XX-XXXX.
6. Enum values are case sensitive, so the value “Proprietorship” must start with capital letter.

### Methods

<b>ActionResult CreateLead(Lead leadWSModel, out CreateLeadResponse createLeadResponse)</b>		
<b>Parameters:</b>	leadWSModel	Lead object
	createLeadResponse	Create lead details object
<b>Comments:</b> Creates a new lead. You must set the Id property of this model to a unique string. You will be able to access the lead later via this string Id.		
<b>Returns:</b> Result of the action – success or fail with error message; CreateLeadResponse – details in the Complex Type Definition section		

<b>ActionResult CreateLeadAndGetMaxQuoteInfo(Lead leadWSModel, out CreateLeadResponse createLeadResponse)</b>		
<b>Parameters:</b>	leadWSModel	Lead object
	createLeadResponse	Create lead details object
	maxQuoteInfo	Max quote information
<b>Comments:</b> Creates a new lead. You must set the Id property of this model to a unique string. You will be able to access the lead later via this string Id.		
<b>Returns:</b> Result of the action – success or fail with error message; CreateLeadResponse – details in the Complex Type Definition section; QuoteInfo – details in the Complex Type Definition section		

<b>ActionResult GetLeadStatus(string leadId, out LeadStatus status)</b>		
<b>Parameters:</b>	leadId	Id associated with the deal
	status	Current status of the deal
<b>Comments:</b> Returns the current status of the deal.		

## Rapid Finance Partner API Version 20

**Returns:** Result of the action – success or fail with error message; LeadStatus – details in the Complex Type Definition section

<b>ActionResult GetLeadsStatusChangeNotifications (out LeadStatusChangeNotification[] statusNotifications)</b>		
<b>Parameters:</b>	statusNotifications	A list of partner deal statuses
<b>Comments:</b> Returns a list with the last partner deal status change for leads since the last status push (if activated) or the last time this method was accessed		
<b>Returns:</b> Result of the action – success or fail with error message; A list of LeadStatusChangeNotification – details in the Complex Type Definition section		

### Complex Type Definition

<b>LeadStatus</b>		
Property Type	Property Name	Values/Comments
StatusEnum	CurrentStatus	Current deal status: <ol style="list-style-type: none"> <li>1. Approved</li> <li>2. ApprovedWithStips</li> <li>3. ConditionallySubmitted</li> <li>4. ContractsOut</li> <li>5. Declined</li> <li>6. Duplicate</li> <li>7. Funded</li> <li>8. InProgress</li> <li>9. PrequalPass</li> <li>10. PreQualFail</li> <li>11. Quoted</li> <li>12. RescindByClient</li> <li>13. RescindByRapidFinance</li> <li>14. SubmittedDeal</li> <li>15. Unqualified_WillingReconsiderLater</li> <li>16. Withdrawn</li> <li>17. Pending</li> <li>18. Rejected</li> </ol>
Decimal	EstimatedCommission	Estimated commission based on the quote with the most progressed status (accepted by client, approved, etc.)
String	DealDetailPortalUrl	The url to the Rapid Finance Partner Portal for the current lead

<b>CreateLeadResponse</b>		
Type	Property Name	Values/Comments

## Rapid Finance Partner API Version 20

decimal	MaxOfferAmount	The product from the list of eligible products that has the highest default amount Value of \$0 means that there are no eligible quotes that can be created
decimal	EstimatedCommissionAmount	Estimated commission for the quote with the above mentioned product details. <b>Currently commissions are disabled in the API so value returned will always be 0.</b>
String	DealDetailsPortalUrl	The url to the Rapid Finance Partner Portal for the current lead
String	LeadId	Created lead Id
String	EappUrl	Link to E-Application form for the deal created
String	CustomerJourneyUrl	Link to customer journey for the deal created

QuoteInfo		
Property Type	Property Name	Values/Comments
ProductTypeEnum	ProductType	Product types: 1. MCA (Merchant Cash Advance) 2. Loan
Integer	ProductTermInMonths	Number of months term
Decimal	Amount	Amount
Integer	NumberOfDays	
Decimal	FeePercent	
Decimal	PaymentAmount	Purchase/Payback amount
Integer	NumberOfPayments	
Decimal	SplitPercent	Only for MCA product type. NULL for the other quotes

Lead – required fields in bold; Character limit or format in brackets.		
Property Type	Property Name	Values/Comments
String(Max:50)	Id	Unique Id set by the client.(used for tracking, if none is assigned a random GUID will be set)
String	Campaign	Unique campaign ID, if applicable
String(Max:100)	CompanyLegalName	Merchant’s company legal name
String(Max:100)	<b>CompanyDb</b> a	Merchant’s company DBA
EntityTypeEnum	EntityType	Merchant’s company legal entity type: 1. LLC 2. Proprietorship 3. CCorp 4. SCorp

## Rapid Finance Partner API Version 20

		<ul style="list-style-type: none"> <li>5. GeneralPartnership</li> <li>6. LLP</li> <li>7. LP</li> </ul>
Address	Address	Merchant's company business address.
String(Min:7, Max:100; Only letters, digits, "." and/or "-" accepted)	BusinessPhone	Business phone number
String(Max:100; Valid e-mail validation)	BusinessEmail	Business e-mail
String(Max:100)	BusinessWebsiteUrl	Merchant's website URL
IndustryEnum	Industry	Merchant's industry (mapping attached)
BusinessCategoryEnum	BusinessCategory	Merchant's business category (mapping attached). Default to "NotInList"
Decimal	AnnualSales	Total annual sales volume
Decimal	AnnualCreditCardSales	Total annual credit card sales. 0 if not available.
Date	BusinessOpenDate	Date business was started
Date	OwnerShipStartDate	Date ownership started
EstimatedCreditScoreEnum	EstimatedFico	<p>Estimated value for the best FICO score between the different guarantors</p> <ul style="list-style-type: none"> <li>• Over700</li> <li>• SixHundred 600-699</li> <li>• FiveHundred 500-599</li> <li>• FourHundred 400-499</li> </ul>
Boolean	HasOpenTaxLiens	True if merchant has any business open tax liens; false otherwise
BusinessOpenTaxLiensAmountEnum (Not needed if hasOpenTaxLiens is false)	BusinessOpenTaxLiensBalance	<p>Total merchant tax lien balance.</p> <ul style="list-style-type: none"> <li>• Under3k</li> <li>• Between3kAnd10k</li> <li>• Between10kAnd25k</li> <li>• Between25kAnd50k</li> <li>• Between50kAnd75k</li> <li>• Between75kAnd150k</li> <li>• MoreThan150k</li> </ul>
Boolean	HasOpenTaxLienPaymentPlan	True if merchant is on a tax lien payment plan for at least 60 days; false otherwise. Default to false;
PurposeEnum	PurposeOfFunds	<p>Merchant's stated purpose for the funds:</p> <ul style="list-style-type: none"> <li>• BuyoutAPartner</li> <li>• ConstructionRenovation</li> <li>• EmergencyWorkingCapital</li> </ul>

## Rapid Finance Partner API Version 20

		<ul style="list-style-type: none"> <li>• Expansion</li> <li>• MarketingExpensePromotion</li> <li>• OpenNewLocation</li> <li>• Other</li> <li>• PayOffTaxLien</li> <li>• PayOffDebt</li> <li>• Payroll</li> <li>• PurchaseEquipmentInventory</li> <li>• Seasonal</li> </ul>
Decimal	RequestedAmount	Amount requested by merchant

### Notes

1. Regarding error handling:  
If the ActionResult that comes back has the Success property false, it should show the error property or at least a generic error and log the real error for debugging purposes.  
The form given shows the deal has been submitted in certain situations even though it failed.
2. The documentation has had recent changes regarding required fields. Some fields have been marked as optional, but now “contact phone” and “contact email” are required fields.

### Error Codes

Error Code	Error Name	Description
200	No error	This is usually for testing purposes. An error shouldn't return with this error code
403	Invalid authentication	This happens when the user and password were not supplied in the request or when they don't match.

## Rapid Finance Partner API Version 20

404	Entity was not found	This usually happens when the client supplied an Id for an object (lead, product, quote etc.) that doesn't exist in our DB
405	Entity validation error	This usually happens when the client supplies through a method an object that he wishes to delete/update/create but the object has fields that didn't pass validation
406	Invalid operation. Prerequisites not met	This usually happens when the user tries to call a method that requires certain prerequisites before it can execute. This error code will contain a message specifying what must be done or what is missing.
500	An error occurred	This specifies that an unexpected error happened
501	A DB Error occurred	This specifies that a DB error occurred. This might happen from faulty data or connection to the DB lost
502	User not associated with company	This should rarely happen and is due to the fact that the user has permissions to access the web service, but is not associated with any partner company.
700	Custom error	Custom errors are errors that don't fit in any of the error codes mentioned earlier. They usually have a descriptive message of what went wrong.
